Djawei — Third-Party Subscriptions & Requirements

Every outside service and account Djawei needs to launch money transfers between the 8 UEMOA countries (Côte d'Ivoire, Senegal, Benin, Togo, Burkina Faso, Mali, Niger, Guinea-Bissau). Backend: Firebase. Currency: XOF only. Prepared 1 November 2026.

At a glance

- **13 subscriptions / accounts**: 10 needed at launch, 3 optional.
- **Fixed costs**: Apple $99/year, Google Play $25 once, domain + email, any provider monthly minimums.
- **Usage costs**: Firebase, SMS, KYC checks (~$1–3 each), and a % per payment and payout.
- **Money you must hold**: an XOF float with the payout provider, and a protected customer-funds account.
- **Start first**: the BCEAO licence or an approved partner — every payment provider asks for it before signing.

1. Subscription list

#	Service	Provider (suggested)	Used for	Pricing model	Launch
1	**Licence / legal**	BCEAO approval, or partner with an approved payment institution / bank	Legal right to move customer money in UEMOA	Partner fee, or approval + legal fees	**Yes**
2	**Backend**	Firebase — Blaze plan	Login, database, Cloud Functions, push	Pay-as-you-go after free quota	**Yes**
3	**Mobile money collect + payout**	CinetPay (main), PayDunya (backup)	Orange, MTN, Moov, Wave in 8 countries; CinetPay checkout screen	% per collection and per payout + XOF float	**Yes**
4	**Bank transfers**	Partner bank (e.g. Ecobank, Orabank, Coris); later BCEAO PI-SPI	Bank-account payouts, "Bank app" approval screen	Per-transfer fee	**Yes**
5	**Cards**	Through CinetPay (Visa, Mastercard, GIM-UEMOA)	Card verification (3-D Secure) screen	% per card payment	Optional
6	**KYC / AML**	Sumsub, Veriff, Onfido or Smile ID	Identity verification screens (ID, selfie, sanctions)	~$1–3 per check + possible monthly minimum	**Yes**
7	**SMS OTP**	Firebase Phone Auth, or Twilio Verify	OTP, phone linking, login	Per SMS (higher for African numbers)	**Yes**
8	**Transactional email**	Brevo, SendGrid or Resend	Receipts, alerts, password reset	Free tier, then monthly plan	**Yes**
9	**Push notifications**	Firebase Cloud Messaging	Notifications tab, transfer alerts	Free	**Yes**
10	**Live chat / WhatsApp**	Crisp, Intercom or Zendesk; WhatsApp Business API	Live chat and Support screens	Free tier / per agent / per conversation	Optional
11	**Apple Developer Program**	Apple	Publish on iPhone (TestFlight + App Store)	$99 / year	**Yes**
12	**Google Play Console**	Google	Publish on Android	$25 one-time	**Yes**

#	Service	Provider (suggested)	Used for	Pricing model	Launch
13	**Domain + business email**	Any registrar + Google Workspace	djawei.com, support@djawei.com	Yearly domain + per user / month	**Yes**

Not needed any more (Europe corridor dropped): Stripe, TrueLayer / Tink, SEPA, EU licence, TerraPay, exchange-rate feed.

2. What each subscription needs

For each service: what to prepare before signing up, and what to set up after.

1. Licence / legal — BCEAO or approved partner

- Company registered in one UEMOA country (e.g. Côte d'Ivoire or Senegal) + local business bank account
- Choose: partner/agent of an approved institution (fastest) or own approval as payment institution / e-money institution under BCEAO Instruction n°001-01-2024
- AML/CFT policy (Banking Commission Instruction n°001-03-2025), compliance officer, CENTIF registration
- Protected customer-funds account at a bank
- Data-protection declarations (e.g. ARTCI in Côte d'Ivoire, CDP in Senegal)

Done when: approval or signed partner agreement, protected funds account and written AML policy.

2. Firebase — Blaze plan

- Google account with billing (card) + budget alert
- Two projects: djawei-dev and djawei-prod; apps registered as com.djawei (Android + iOS)
- Enable Auth (phone, email, Google, Apple), Firestore, Cloud Functions, Secret Manager, App Check, Crashlytics, FCM
- Firestore security rules: users read only their own data; only Cloud Functions change transfer status

Cost: free quota, then per read/write, function call, GB and SMS.

3. CinetPay (main) + PayDunya (backup) — mobile money

- Company documents, ID of directors, bank account (RIB), licence or partner proof
- Confirm in writing: collection AND payout supported for each operator in all 8 countries
- Enable payment API + transfer (payout) API; get API key and site ID; set webhook URLs to Cloud Functions
- Fund the XOF float; set up daily top-up and reconciliation

Cost: % per collection and per payout, by country and operator — get a written quote.

4. Partner bank / PI-SPI — bank transfers

- Business account at a pan-UEMOA bank; API or bulk-payment access
- Account-name check before payout to avoid wrong-account transfers
- Later: connection to BCEAO PI-SPI instant network through an approved participant

Cost: per-transfer fee set by the bank / participant.

5. Cards — through CinetPay

- Ask CinetPay to enable card acceptance with 3-D Secure, including GIM-UEMOA cards
- Never store card numbers yourself (PCI DSS handled by the gateway)

Cost: usually a higher % than mobile money.

6. KYC / AML provider

- Contract + data-processing agreement; sandbox keys
- Check document coverage for all 8 countries: national ID (CNI), passport, consular card
- React Native SDK in the KYC screens; webhook to set kycStatus; sanctions/PEP screening on

Cost: ~$1–3 per check, often with a monthly minimum.

7. SMS OTP

- Firebase Phone Auth first; add Twilio Verify or a regional SMS provider if delivery is poor
- Test on the main operators of every country

Cost: per SMS.

8. Email · 9. Push · 10. Chat

- Email: Brevo / SendGrid / Resend account, SPF + DKIM on djawei.com
- Push: upload Apple APNs key into Firebase (FCM is free)
- Chat: Crisp (free tier) or Intercom / Zendesk in French + English; optional WhatsApp Business API

Cost: free tiers to start.

11. Apple · 12. Google Play · 13. Domain

- Apple Developer Program as an organisation (needs D-U-N-S number) — $99/year
- Google Play Console organisation account — $25 one-time
- Sign in with Apple is required on iOS because the app offers Google sign-in
- Store listings in French + English, privacy policy URL, financial-services declarations
- Domain djawei.com + support@djawei.com

Cost: fixed yearly / one-time.

3. Sign-up checklist (in order)

☐	BCEAO approval or signed agreement with an approved partner
☐	Company + local bank account + protected customer-funds account
☐	AML policy, compliance officer, CENTIF registration
☐	Firebase prod + dev on Blaze
☐	KYC provider contract (Sumsub / Veriff / Onfido / Smile ID)
☐	CinetPay merchant account (collection + payout) and XOF float
☐	PayDunya backup quote
☐	Partner bank API access
☐	Card acceptance enabled (optional at launch)
☐	SMS provider tested in all 8 countries
☐	Email provider + domain + support email
☐	Apple Developer + Google Play accounts
☐	Live chat tool (optional)
